

Student Recruitment Project Team

Manager/Supervisor Training
August 3, 2017

Our Strategy and Process

- ▶ In our 10 weeks together, the team has worked cohesively challenging ideas, practices and one another to come up with an improved, streamlined process that addresses our stakeholders' concerns and the expectations set forth by the Project Sponsors. We did this by:
 - ▶ Identifying **WHO** our stakeholders are, **WHAT** is the current process, **HOW** did we get to the current state and **WHY/HOW** do current policies, practices and systems affect the process
 - ▶ Reaching out to stakeholders to get input and feedback on their experience with the student hiring process to ensure we addressed concerns across the university
 - ▶ Meeting with Financial Aid to explore and better understand how work study codes are assigned and interact with student recruitment
 - ▶ Breaking down the student recruitment process from posting request → onboarding
 - ▶ Ideal-Logic demonstration
 - ▶ Database system used by COE for GRA/GTA appointments (starting to implement regular student positions)
 - ▶ Identifying where flexibility is important and where standardization should occur

Immediate Action Plan

1. Centralized online request form
 - a) A user-friendly template that populates information and allows supervisors to change as needed
