

Preclinical development of gonorrhea vaccines and assessment of new antibiotic targets

Department: Oregon State University, Department of Pharmaceutical Sciences
Location: Corvallis, Oregon, USA

Dr. Aleksandra E. Sikora is accepting applications for a postdoctoral research position focusing on preclinical development of gonorrhea vaccines and assessment of new antibiotic targets.

We welcome candidates from all backgrounds and identities who have expertise in microbiology, protein purification using FPLC, molecular biology/biochemistry, or laboratory small animal models.

We foster opportunities for professional and personal development and value work-life balance.

Salary levels for postdoctoral scholars are governed by OSU policy based on NIH NRSA fellows. Current salary rates and additional information can be found at <https://gradschool.oregonstate.edu/postdocs/stipends-and-benefits>.

To apply, please send an email to Dr. Aleksandra Sikora (Aleksandra.Sikora@oregonstate.edu) with reference "postdoc application" in the subject line and include a single PDF file containing a cover letter, CV, and contact information for three references.

- Cover Letter should describe your relevant research interests related to microbiology, biochemistry, protein purification, and animal models.
- CV should contain a complete list of published publications.

Application Deadline: Applications will be accepted until a suitable candidate is identified.
